

The Efficiency of Electric Vehicles

One gallon goes further

charge at home or at public charging stations

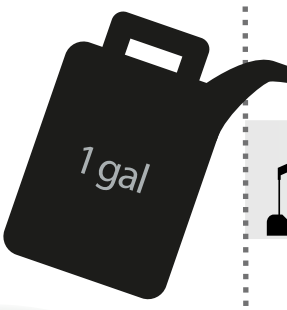

Electricity can be generated from clean, local, renewable sources of energy.

One gallon of oil will take you

65.6 miles

fuel cost: \$0.12 per mile

Electricity beats gasoline every time: It's cheaper. It's cleaner. It's more efficient.

power plant: oil becomes electricity

CO₂

refinery: oil becomes gasoline

One gallon of gasoline will take you

20.2 miles

fuel cost: \$0.20 per mile
